RE-ENGINEERING AND MACHINING

In-house capabilities to continue to support your out of production engines, engineer out faults – keeping your equipment running.

Combining our experience manufacturing for engine makers with our extensive engine knowledge we are ideally positioned to be able to offer manufacturing and re-engineering options.

We can help with the following:

- Lack of availability of obsolete parts
- Ongoing problem which hasn't been resolved by the OEM
- Need to upgrade to latest regulations
- Improve reliability or performance
- Cost-effective solutions, whilst maintaining technical integrity
- Full documentation & test sheets

For free advice on your requirements, call us now on +44 (0) 1206 791552

Proud to be working with:

Dealers For:

Bartech Marine Engineering

RE-ENGINEERING AND MACHINING HIGHLIGHTS

CAD & ELECTRICAL DRAWINGS
12 MONTH WARRANTY
COST-EFFECTIVE SOLUTION

Highlights of previous machining and re-engineering projects include:

- Improve visibility of engine performance with designed, built & installed gauge panels
- Redesign of tooling for more effective application
- Life extension of cylinder heads machining & installation of inserts
- Machining bushes to finished specifications
- Machining connecting rods to bring ovality back within tolerance
